We invite you to look through our new catalog and discover the ideal lighting tools for your needs. From basic models to the high-performance 9410L LED Lantern (our brightest handheld flashlight), we have a wide range of advanced lighting systems to support professionals, outdoor enthusiasts and more. Whether you need an LED flashlight, lantern, or remote area lighting system, Pelican has you covered. We are committed to environmentally responsible manufacturing, in fact most of our lights use LED bulbs that help protect our planet. LEDs are long lasting, promote extended battery life and allow for many hours of continuous use.

PERFORMANCE

ANSI STANDARDS (AMERICAN NATIONAL STANDARDS INSTITUTE)

Why create standards? While Pelican was one of the first manufacturers to use the flashlight industry, developed performance standards and symbols to effectively communicate a flashlight’s features and benefits. The resulting ANSI/NEPA FL 1 Standards include the following six criteria:

STANDARDS AND RATINGS
(APPLICABLE TO FLASHLIGHTS ONLY)

Glossary of Terms

Canada A unit of measurement of the amount of brightness that comes from a right light source in a particular direction.

Footcandle A unit of measurement of the intensity of light that is emitted by a light source and is observed in a particular direction. The intensity of light is measured in footcandles.

Lumen A unit of measurement of the amount of brightness that comes from a light source. Lumen is the basic unit of measurement for light energy. One lumen is equal to one footcandle.

Peak Beam Intensity The maximum brightness intensity typically measured at the central axis of a cone of light. The value is reported in lumens and does not change with distance.

Permeability To allow something to pass through. A device with high permeability allows liquids or gases to pass through easily.

Perspective A way of looking at something. In this case, the perspective is the point of view from which the device is viewed.

Performance Data In this context, performance data refers to the characteristics of a flashlight, such as light output, run time, and beam distance.

NEW DEEP MOUNT LED TECHNOLOGY

Our engineering team has designed a new high performance LED Deep module (Deep Mount LED Module). These lights are now brighter, with close to 100% increase in lumens and a 2.5 times increase in lux value over previous versions (as well as offering a more robust design).

1. New deep-dish reflector provides up to 2.5 times increase in lumens, and 2.5 times increase in lux value.
2. Robust, over-molded polycarbonate lens won’t yellow.
3. Opti-mechanical design gathers and focuses 100% of the light.
4. LED is mounted directly to the PCB board, creating a strong and efficient design solution.

Hazardous Area Electrical Guidelines

DIVISION 1 Flammable Gases, Vapors, or Liquids Oil Refinery, Paint Warehouse Spray Booth, Offshore Oil Rig

DIVISION 2 (hazard not likely): Where volatile substances can exist all of the time or some of the time under normal operating conditions. Where volatile substances are not likely to exist under normal operating conditions.

DIVISION 1 Combustible Dusts Coal Mine, Munitions Factory, Grain Silo, Hay Storage Facility

DIVISION 2 (hazard not likely): Where volatile substances can exist all of the time or some of the time under normal operating conditions. Where volatile substances are not likely to exist under normal operating conditions.

Depth of Inflammability Limits (Dill, 1980): These value limitations are based on the volatile fuel concentration at which the fuel-air mixture is just ignitable.
5 SERIES FLASHLIGHTS

Our new 5 Series flashlights feature slide beam technology. The flood position projects a wide beam to illuminate your work area or use the spot beam for a long distance focused beam.

PELICAN CASE Included

REMOTE AREA LIGHTING SYSTEMS

Providing increased performance, safer working conditions, emergency preparedness and greater flexibility, Pelican’s RALS line is the modern alternative to generator based lighting:

- Silent performance
- No exhaust fumes
- No flammable fuel
- Eliminated trip hazards
- Remote activation
- Little to no heat
12V POWER SUPPLY
WITH DUAL USB ADAPTER

12 volt power supply port can be used to power any electrical product that utilizes a standard 12v vehicle style connector (up to 4 amps) or a variety of USB connections.

BLUETOOTH™ CONTROL
Bluetooth app controls multiple units and variable light from 0-100% output. Free App for iOS™ and Android™.

MULTI-TERRAIN TROLLEY
(LIMITED EDITION)
Large 1.5 inch polyurethane wheels allow for easier transport across rough surfaces. Molded feet level and stabilize case.

9460/9460M RALS

LIGHT SOURCE // LED
BATTERIES // Sealed Lead Acid
DIMENSIONS // 23.25” (59.1 cm) Closed, 79.50” (201.9 cm) Deployed

SWAPPABLE POWER PACK
Swappable power pack w/12v aux. port adapter powers smartphones, laptops, etc.
When compact size is a must or just a convenience, choose from Pelican’s range of powerful lights. Whether composite or alloy, certified or colored, you’ll find the perfect model for your next job.
MEDIUM LIGHTS

Nothing beats the versatility of a hand-held light. Easy to carry, stash in a pocket, or clip to a helmet, these lights do just about everything. And when hazardous areas are present, you can count on Pelican’s line of safety certified lighting tools. You’ll even find photoluminescent models made with “glow-in-the-dark” material to help you find your flashlight in an emergency.

RIGHT ANGLE / ARTICULATING LIGHTS

Firefighters put everything on the line and the correct lighting tools are critical. Right angle (90°) and adjustable head flashlights often worn on turnout coats offer hands-free performance. With extreme peak beam intensity and smoke-cutting penetration, these lights will get you in and out of tough situations safely.
