This report contains true and correct data obtained in the performance of the test program set forth in your purchase order. Test methods, results, and equipment used are recorded on these data sheets.

Where applicable, instrumentation used in obtaining this data has been calibrated using standards which are traceable to the National Institute of Standards and Technology.

SUMMARY:

One Case, Part No. 1440-000-110 (no serial number), was subjected to Dust IP6X Category 2 Testing in accordance with CEI IEC 529 specifications. One Case, Part No. 1440 (nc serial number), was subjected Immersion IPX7 Testing in accordance with CEI IEC 529 specifications. Upon completion of the tests, no visible evidence of damage to the test specimen was observed. Complete test details, including photos and equipment lists, are contained in this report.

Date Started 10/13/2006  
Date Comp. 10/13/2006

Requirements:

Dust Concentration: 2 Kg per cubic meter test chamber volume  
Duration: 8 hours

Test Method:

Place the test specimen in a test chamber. Establish a dust concentration of 2 Kg per cubic meter of test chamber volume. Expose the test specimen to this dust environment for 8 hours.

Remove accumulated dust from the test specimen by brushing, wiping, or shaking, taking care to avoid introducing additional dust into the test item. Do not remove dust by either air blast or vacuum cleaning. Perform a visual examination for evidence of damage or deterioration.

Test Results:

All testing was performed according to the Test Methods and Requirements stated above. Upon completion of the test, no visual evidence of dust intrusion was observed inside the test specimen. No visible evidence of damage to the test specimen was observed upon completion of testing.

DATA SHEET

Test Title: Immersion (IPX7)

Customer: Pelican Products, Inc.
Job No.: 53628

Specimen: Case
Date Started: 11/8/2006

Part No.: 1440
Date Comp.: 11/8/2006

Serial No.: N/A

Spec: CEI IEC 529
Par: 14.2.7

Photo: Yes

Amb. Temp: 75° ± 15 °F

Requirements:

Water Level: Test specimens with a height less than 850 mm (33.46 inches) has the lowest point of the test specimen 1000 mm (39.37 inches) below the surface of the water surface. Test specimens with a height equal to or greater than 850 mm (33.46 inches) has the highest point of the test specimen 150 mm (3.9 inches) below the surface of the water.

Water Temperature: Water temperature maintained at not less than 5 °K (10 °F) below the specimen temperature.

Soak Duration: 30 minutes

Test Method:

Visually inspect the test specimen. Place the test specimen in a submersion tank. Test specimens with a height less than 850 mm (33.46 inches) has the lowest point of the test specimen 1000 mm (39.37 inches) below the surface of the water surface. Test specimens with a height equal to or greater than 850 mm (33.46 inches) has the highest point of the test specimen 150 mm (3.9 inches) below the surface of the water.

Verify the water temperature is not less than 5 °K (10 °F) below the specimen temperature. Allow the test specimen to soak for 30 minutes.

Remove the test specimen from the tank. To check for the presence of moisture inside the specimen the specimen is to be cut open per customer directions. Document all results.

Test Results:

The test was performed in accordance with the Test Method and Requirements stated above. Weights totaling 200 lbs were placed inside the test specimen to eliminate buoyancy. Upon completion of the test, no water was observed in the test specimen. No visible evidence of damage to the test specimen was observed upon completion of testing.
