THE NEW PELICAN™ 9455 RALS

The danger zone never looked so bright. With a Class I Division 1 certification and up to 1600 lumens, now you can take remote area lighting to hazardous areas around the globe (IECEx ia, Zone 0 certified). With a mast that reaches close to 3 feet and a head that rotates 360°, the Pelican™ 9455 RALS gives you full control to adjust the light. And with up to 10 hours of output on a single charge, the Pelican™ 9455 RALS works overtime.

The 125° beam spread lights up the entire work area so you see the work at hand and the peripheral hazards around you, leading to better situational awareness.
