

2460Z1 & 3660Z1 BATTERIES CHANGE

Peli has made a change to the batteries that power the 2460Z1 and 3660Z1. Until now, these products used a battery pack which consisted of four cells assembled into one unit. Going forward, these products will be shipped with four individual AA NiMH batteries that are Peli branded.

For all 2460Z1/3660Z1 made **prior** to October 2nd, 2017, the new battery replacement kit will include four AA NiMH Peli batteries, a modified contact module, a plastic separator and instructions on the installation and use. **These all must be used together to maintain ATEX certification.**

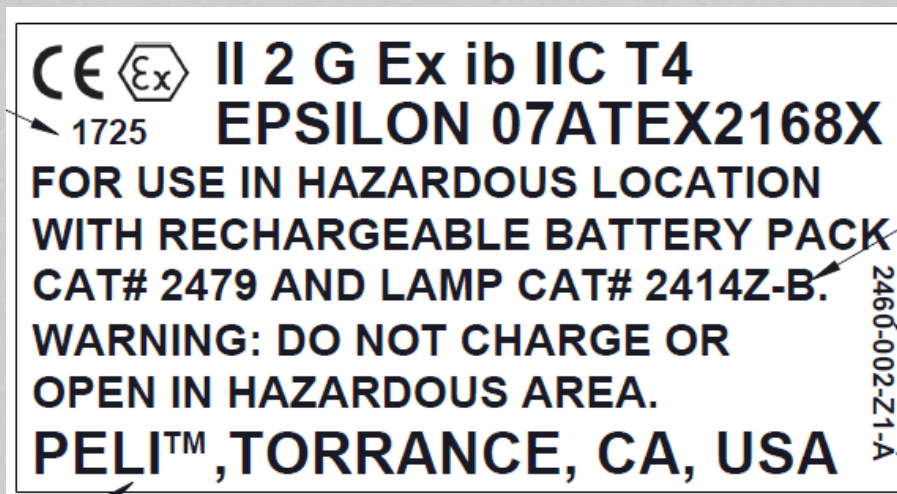

Separator for use with four individual AA NiMH Peli batteries.

#2479 kit (2460-301-000E) with batteries, separator, contact module and instruction sheet.

For all 2460Z1/3660Z1 made **after** October 2nd, the battery replacement kit will be a carded four pack of AA NiMH Peli branded batteries. The modified contact module and spacer are not required as we made changes in production that eliminate the need for these extra pieces. (**NOTE:** the existing #2479 battery pack (green wrap) **will NOT work** with the torches made after October 2nd. They will not fit into the body due to changes necessary to utilize the individual cells).

If the torch has either one of the below approval markings, use the #2479 kit.

**PELI 2460Z1 & 3660Z1
ATEX LIGHTS**
